

Restore a lake /pond near your locality using completely natural methods

HIGHLIGHTS

- Revival of lake ecology using completely natural methods
- Involves all stakeholders including local communities
- Plantation of Native Trees, Grass, Shrubs
- Holistic approach to increase Biodiversity

HELPS RESTORING WATER SOURCES ECOLOGICALLY & ECONOMICALLY

We use natural & bio intervention methods not only restore but also enhance the ecosystem. Use of bioenzymes & growing the vegetation around breathes life in to the water body and improves and aquatic life.
